REPORT OF TRUSTEES.

To the Legislature of the State of Mississippi :

GENTLEMEN : It is made our duty, as the Trustees of the Institution for the Deaf and Dumb of the State of Mississippi, respectfully to submit to your Honorable Body the following Biennial Report, covering both the White and Colored Departments, for the years 1886 and 1887 :

This document, we would have placed before you at an earlier day, had it not been that we could not make it complete before the 31st of December, which is the close of our fiscal year. Were the close of our fiscal year made a month earlier, say the 30th of November, there would be ample time to complete reports, and place them before the Legislature immediately upon its assembling.

It affords us pleasure to report that the Institution placed under our care, has, in both departments, been managed with commendable skill by those immediately in charge, and maintained in a comfortable condition for the two years just closed.

Our active and energetic Superintendent, and our efficient corps of teachers and officers, have been faithful in the discharge of the respective duties assigned to them, have worked together in entire harmony, and with the laudable ambition to place this institution among the foremost of its kind.

The conduct of the pupils has been, in the main, praiseworthy. Good order has generally prevailed throughout, and the advancement made in the studies pursued in the Institution is highly gratifying. The funds entrusted to us for its support have been expended with the utmost economy of which we were capable ; and we have endeavored to save every expense consistent with the proper support of those for whom the State made this appropriation. Yet, with all our endeavors, we have come short about eight hundred dollars. Every item of expense incurred during the last two years, you will find in a detailed statement in the report of the Superintendent, herewith submitted ; and the proper vouchers for the same will also be submitted for your examination and scrutiny.

We also call your earnest attention to the recommendations made to the Board by the Superintendent in his report, which, upon careful examination, we recommend to your favorable con-

sideration. Repairs in and around the Institution are severely needed. For the past two years, we had no fund for this specific purpose, and such repairs as were imperatively demanded, were made out of the support fund. A more suitable building is needed for the laundry. This, it seems to us, the good health of the pupils requires. In addition, better shops are needed, if, to any considerable extent, instruction in the mechanic arts is to be given in the Institution.

We also recommend that an increased appropriation be made for transportation for the present biennial term, as the appropriation made for the last two years was quite inadequate. We ask for such appropriation for the present year and for 1889 as shall, with rigid economy, maintain this Institution in both departments, in such state of efficiency as shall accomplish the end contemplated in its existence.

We cannot conclude our report without calling your special attention to the fact, which you will find more in detail in the Superintendent's report, that a convention of the Superintendents and Principals of all the Institutions for the Deaf and Dumb, in the United States and Canada, is to be held in our Institution next April, upon the invitation of His Excellency, the Governor, and the Board of Trustees; and it is but natural for all our people to desire that our State should not be found behind any of her sister States, or Canada, in provident care for this unfortunate class of our citizens for whose benefit such Institutions are founded.

We have the honor to be, gentlemen, with highest consideration, very respectfully, your obedient servants,

JOHN HUNTER,
D. N. BARROWS,
R. L. SAUNDERS,
E. WATKINS,
M. S. CRAFT, M. D.

Superintendent's Report.

TO THE BOARD OF TRUSTEES—GENTLEMEN:

Another biennial period has passed and I have the honor of presenting to you a report of the workings of the Institution for the education of the Deaf for the years 1886 and 1887.

The teachers and officers have been faithful to their duties, the pupils generally have been respectful, obedient and studious, everything has been harmonious, and two more pleasant and prosperous years have been added to the history of the Institution.

We enrolled 90 pupils during the year 1886 and 93 during the year 1887, and have 76 present at this writing. The greatest number present at one time during the two years was 83.

The health of the pupils has been generally very good but we have had two or three cases of severe sickness. We have lost none by death while connected with the Institution. One died during the last vacation from fever contracted after reaching home. In this connection it affords me pleasure to acknowledge the kind attention and efficient services of Dr. John F. Hunter, during the sickness of our regular physician, Dr. Craft.

TRADES.

We are still trying to do something in the way of trades. The boys in the printing office have made good progress when we consider the condition of the office. The Legislature of 1882 gave us a small appropriation for trades, but as no appropriation has been made for this purpose since that time, we are very much in need of additional press, type, tools, etc. The building that had been used previous to that time for a stable, was converted into a shop, as we thought, to answer the purpose temporarily. We are still forced to use this unsightly and inferior building.

The building occupied by the laundry is equally as unsuited. All the girls, who are large enough, are required to do their own ironing, (not as a matter of economy but as education) and they are so exposed in this building that there is constant danger of contracting colds which might result in severe, if not fatal, sickness. It is impossible to heat these rooms, (shops and laundry) with an even temperature. The occupants cannot all be near the fire. The pupils are confined most of the time, in well heated rooms, and the consequence is, when they go into these open structures on a cold day, the exposure is very great.

If we cannot get some relief in this matter, it would be prudent and economical to relieve the girls from this duty, and abandon all efforts at teaching the boys a trade. I hope you will present this plain question to the Legislature: shall we prepare these pupils for usefulness by teaching them trades, or shall we send them out unable to support themselves and to be provided for by friends?

Our store-room is totally inadequate for a large quantity of provisions. It is a small room built on the end of a gallery. It is old and rotten, and cannot be repaired so as to keep it from leaking. The estimate for the building for laundry and shops is made with the view of providing a store-room that will be adequate to all needs for the present.

Some of the girls have made fine progress in cutting and fitting, and needle work, and most of them, when they come to leave school, have gained sufficient knowledge to make them independent. If the means are provided, there is no reason why the average deaf person should not finish his or her course in an institution like this, with sufficient knowledge and skill to make him or her self-supporting.

SUPPORT.

Two years ago you were of the opinion that it would require \$14,000.00 to do the repairs and meet all other expenses for the two years. When it was decided that we could only get \$12,500 we at once proceeded to cut off every thing in which a dollar could be saved. The first change to be made was the dispensing with (much to the danger of life and property) the night watchman, by which \$30.00 per month were saved to the support fund. The next thing, equally as dangerous, was to light the building with oil instead of gas. While no accident has occurred from the use of oil, we have narrowly escaped several times. The cabinet workman was then dismissed and the boys deprived of this benefit. A great many minor changes were made, but with all the pruning, and the stringent economy practiced during the time covered by this report, it has been impossible to come out even, and the salaries and accounts for December, 1887, are still unpaid.

The appropriation for transportation for the past two years has not been sufficient and should be raised to what it was in 1883. But for the kindness of the Mobile & Ohio Railroad in returning our pupils both years free, and the V. & M. granting us half fare in 1886 and one-fourth fare in 1887, some would not have been able to come back to school. We should acknowledge the obligations we are under to these roads.

Below will be found a reasonable estimate of what is absolutely needed:

Furniture and bedding	\$	546 00
School room furniture		180 00

SUPERINTENDENT'S REPORT.

7

Large slates (80).....	245 00
Necessary repairs.....	1,000 00
Buildings for shops and laundry and store-room..	2,000 00
Appropriation for transportation 1888	250 00
“ “ “ 1889	250 00
“ “ support, 1888.	12,500 00
“ “ “ 1889 ..	12,500 00
Appropriation deficit for 1886, '87.....	800 00

It must be remembered that these estimates are for both the white and colored Institutions, and the support of both departments was included in the expenditures for the last two years.

From your knowledge of present necessities you can judge of the correctness of the above estimate.

CONFERENCE OF SUPERINTENDENTS AND PRINCIPALS.

The Superintendents of the Institutions for the education of the deaf of the United States and Canada, hold quadrennial conferences, to discuss the best methods of managing these Institutions. It is customary, upon the invitation of the trustees, for these conferences to be held in some Institution of this kind. Your invitation to this conference to hold its sixth session in our Institution, has been accepted, and we will have the honor, in April next, of entertaining the members of the first conference to assemble in the South. We are looking forward to this privilege with much pleasure, and hoping to derive great profit from the deliberations of this body. I have endeavored, as briefly as possible, to present the subjects that should receive the consideration of the Legislature, and I think, from your regular monthly meetings at the Institution and your recent thorough inspection, in a body, of every department, you will see the wisdom of these recommendations and will urge these appropriations.

We have had several visits from Governor Lowry in the past two years, and his interest in the welfare of the Institution has been shown in many ways.

We are under obligations to the Hons. J. Z. George, Ethel Barksdale and Chas. E. Hooker, for seeds, public documents, etc., sent from Washington.

Appended to this report you will find a catalogue of pupils for the years 1886 and 1887, a financial statement, a detailed report of expenditures for each year, a report from the foreman of the farm and other minor matters submitted for your information.

Please accept through me the thanks of all connected with the Institution for your interest and kindness. As to myself, I am constantly under obligations for your confidence and support.

With grateful acknowledgments for the blessings of the past, and hoping that a kind Providence will continue to smile upon us, I most respectfully submit this report.

J. R. DOBYNS,

Superintendent Institution for the Deaf.

Jackson, Miss., December 31, 1887.

White, Wm.....	Jackson.....	Hinds.

TERMS OF ADMISSION.

1. This Institution is located in the city of Jackson. It was established by the Legislature and is supported by the State; it is not in any sense an asylum, but a school for the education of deaf mutes.

2. The Institution is open to all the deaf mutes of the State who are desirous of receiving an education. Eight is considered the best age to begin their education, and parents are urged not to delay it beyond the age of eight or ten, at farthest. Mutes whose primary education is deferred until they are eighteen or twenty can never be well educated.

3. Boarding, tuition, books and medical attendance are furnished by the State. To the very poor, clothing and transportation are supplied free, but in order to secure this benefit the Superintendent must have a certificate, signed by some proper officer, or some other evidence of the pupil's indigency.

4. The school session opens the first week in October and closes the last week in June; vacation, July. August and September.

5. Parents are expected to take their children home in vacation.

6. Parents in sending their children to the institution should be careful to send the names and postoffice of father and mother, the child's name in full, date of birth, cause of deafness and when lost hearing.

7. Pupils are given ample opportunity to correspond with their parents and friends during the session. They are required to write letters on the first and third Mondays of each month, and to send at least one to parents or guardians.

8. Each pupil should be supplied with enough clothing to do the year, including a comfortable wrap for winter, and enough stamps and stationery to write home once a month, and oftener if desired.

9. Parents should paste a complete list of all clothing on the top, and inside, of the trunk. As soon as the pupil arrives the clothing will be counted to see if correct, and the list preserved. If anything is lost in the wash during session it will be replaced.

10. All clothing should be marked in full name of the owner with indelible ink.

11. Further information concerning the institution may be had by addressing the Superintendent.

J. R. DOBYNS,

• Institution for the Education of the Deaf and Dumb,
Jackson, Mississippi.

Report of Foreman of Farm for 1886.

240 bushels of corn, @ 60c.....	\$ 144 00
